The examiner's amendment discussed with George F. Lesmes will not be entered due to the discovery of relevant prior art, which is discussed below.

It is noted that in the specification, pp. 7,8, recitations of "graph" or "graphs" are found which appear to refer to the instant figures. It is suggested that these be deleted and replaced with -- Figure -- or -- Figures --, respectively.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly '394.

Kelly suggests the instantly claimed process of recycling the catalyst in an oxidation reaction of an organic compound by treating the catalyst solution with an ion exchange resin which is the same resin as is instantly disclosed, Eichrome Diphonix, and therefore would appear to comprise diphosphonic acid groups as well as sulfonic groups. See the bottom of col. 10 and col. 1.

Claim 8 is objected to as dependent on a rejected base claim.

Applicant's arguments filed March 15, 2004 have been fully considered and they are persuasive. Claims 1-4 are allowable over the cited prior art of record.
